What are the benefits?

Job-Ready Salesforce Skills:

Acquire practical proficiency in high-demand modules like Sales Cloud, Service Cloud, Apex development, and Administration, enabling immediate contribution to entry-level roles.

Industry-Recognized Certifications:

Earn certifications such as Salesforce Certified Administrator and Platform Developer I, significantly enhancing employability and credibility in the competitive job market.

Access to Growing Job Opportunities:

Tap into the booming Salesforce ecosystem in South India, with Bengaluru, Chennai, Hyderabad, and other cities offering extensive job openings across IT firms and startups.

Competitive Salary Potential:

Open pathways to attractive entry-level salaries (~₹3-5 lakhs per annum), with rapid growth possibilities as skills and experience increase.

Career Growth and Networking:

Build a foundation for continuous career advancement in cloud computing and CRM domains, supported by access to Salesforce communities, mentors, and placement networks in South India.

- Anyone with a passion for cloud technology and customer relationship management.
- Aspiring Students who come to US for their Masters.

About Pelican Valley:

Pelican Valley is more than a training academy - it is a purpose-built ecosystem designed to nurture talent, launch careers, and connect ambitious graduates with meaningful employment in India's IT industry.

Based just outside Chennai, we bring together world-class Salesforce training, expert mentorship, project-based learning, and employability support - delivered through online and hybrid formats that combine the flexibility of digital learning with the depth of live interaction.

Our mission

Close the gap between fresh graduates and high-demand job opportunities in India's IT and services sector.

We achieve this by offering certification-focused training, hands-on project experience, and direct pathways into employers - including startups and companies in SEZs such as Sri City and Vedurupattu.

Why Salesforce

Salesforce is one of the fastest-growing skillsets in the software industry. Pelican Valley's Talent Academy builds job-ready consultants, administrators, and developers through a blend of guided online sessions, live mentoring, and real-world projects. Learners graduate not only with globally recognized certifications but with confidence, portfolios, and applied experience that employers value.

Why Pelican Valley?

Hybrid & immersive learning: Our programs combine live online classes, self-paced modules, and optional in-person workshops. This allows learners to balance deep practice with flexibility, while still benefiting from peer learning, instructor interaction, and collaborative project work.

Industry-led mentors: Courses are delivered by senior practitioners and Salesforce-certified professionals - consultants, architects, and developers with proven enterprise experience. Learners gain insights from real implementations and receive mentorship from experts connected to global Salesforce networks.

Project-first pedagogy: Every cohort works on live or simulated projects for startups, partner companies, and Effexoft (our founding partner). Projects cover requirements gathering, design, configuration, integration, testing, and user training - so graduates demonstrate practical capability, not just textbook knowledge.

Full employability support

Beyond technical expertise, our curriculum equips graduates with soft skills, interview readiness, resume crafting, and client-facing confidence. Through online mock-interviews, role-play activities, and remote hiring drives with employers, participants are prepared for success from day one.
